

## Focused Areas

Technological innovation, patient care, global health challenges, interdisciplinary collaboration, health policies and ethics, Phyto chemistry, Nanotechnology, Pharmaceutical Technology, Pharmacology, Pharmacy Practice, Drug discovery.

## About The University

Swabi is the capital of the Swabi District in the Khyber Pakhtunkhwa province of Pakistan, situated near the bank of the Indus River. Close to Swabi is the settlement of Hund, one of the historical capitals of ancient Gandhara. The noteworthy and historical place in the Swabi District is Tarbela Dam, situated on the Indus River. It holds the distinction of being the world's largest earth-filled dam and the second-largest by structural volume. Other historical sites in the district include Rani Ghat, Fort of Hund, Hund Museum, Karamar Mountain, Mahaban, and Kund Park.

The University of Swabi is a recently established public-sector university located in Anbar, at the central part of the Swabi District, Khyber Pakhtunkhwa, Pakistan, along the Peshawar-Islamabad Motorway established by the Khyber Pakhtunkhwa government in 2012. The University of Swabi provides excellent teaching and research opportunities for quality education. It offers undergraduate and postgraduate programs across 28 teaching departments.

The Department of Pharmacy was founded in 2011 as the Anbar Campus of Abdul Wali Khan University Mardan (AWKUM). After receiving formal permission from the Pharmacy Council of Pakistan (PCP), the department transitioned to the University of Swabi in November 2013. It is equipped with state-of-the-art facilities and overseen by highly qualified faculty. The department aims to prepare graduates for the challenges of rapidly changing pharmaceutical technologies. We have ambitious plans to initiate postgraduate programs in the field of pharmaceutical sciences to meet the demand for professionals in research and development. On behalf of the faculty and staff of the department, I extend a warm welcome to all, wishing you a successful future in the field of Pharmaceutical Sciences.
